

Average AQI by City

Higher AQI = More Polluted

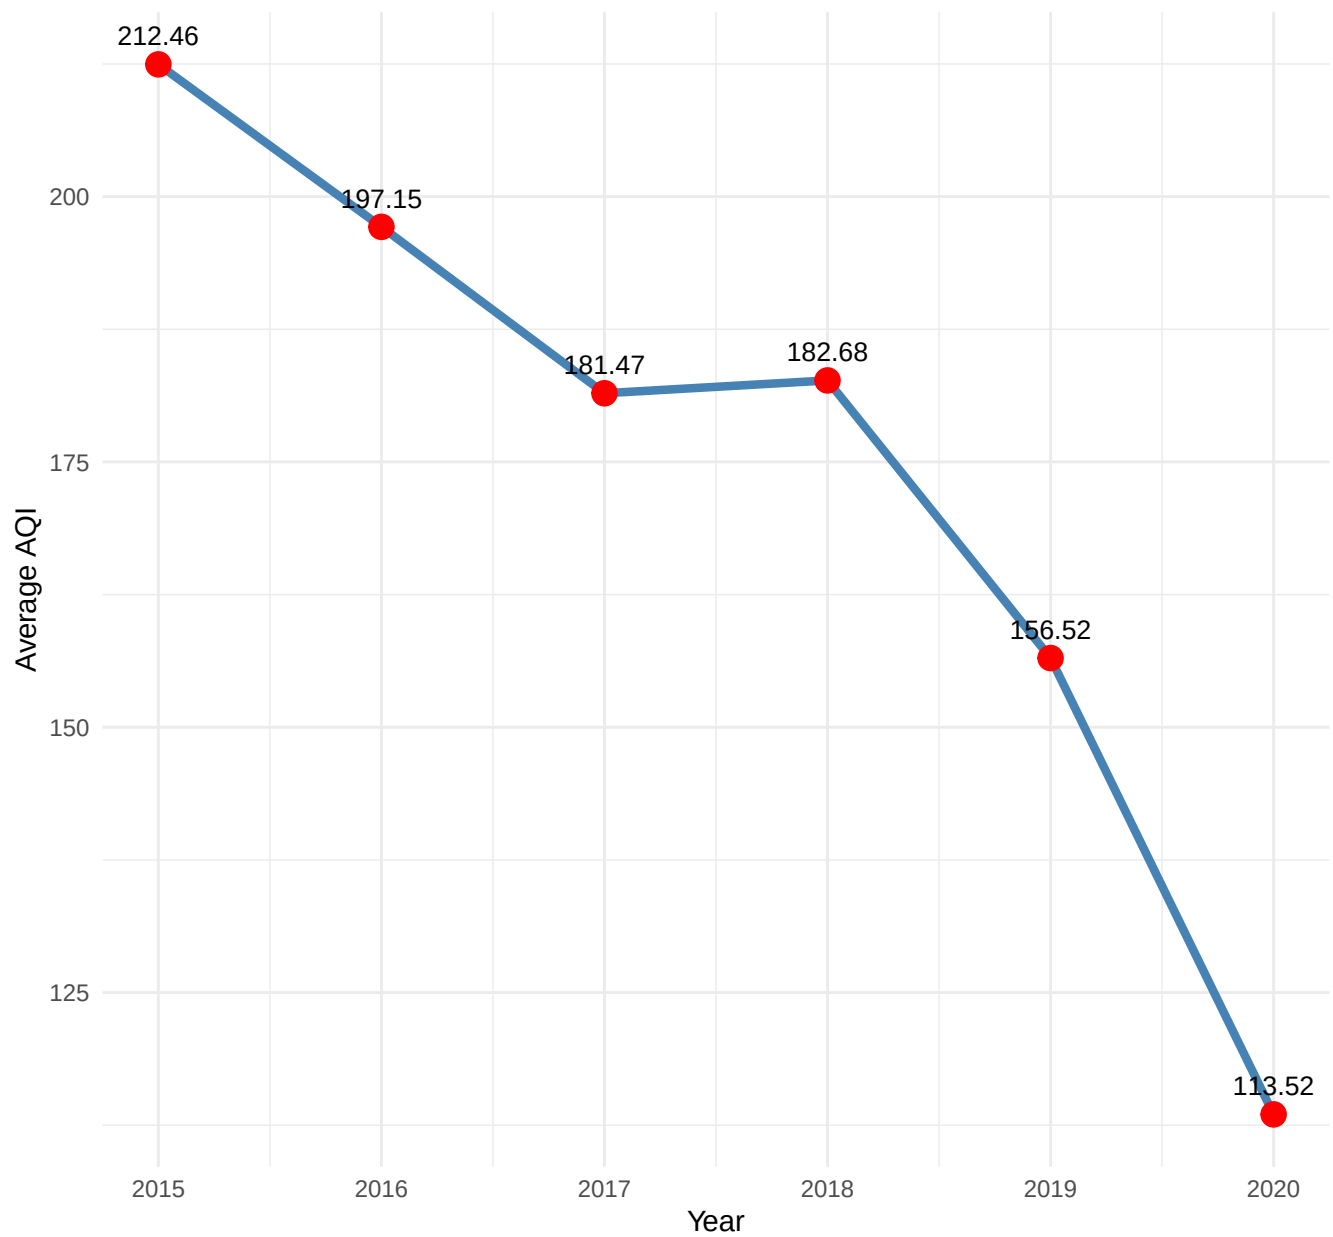

Top 10 Most Polluted Cities
Based on Average AQI 2015–2020

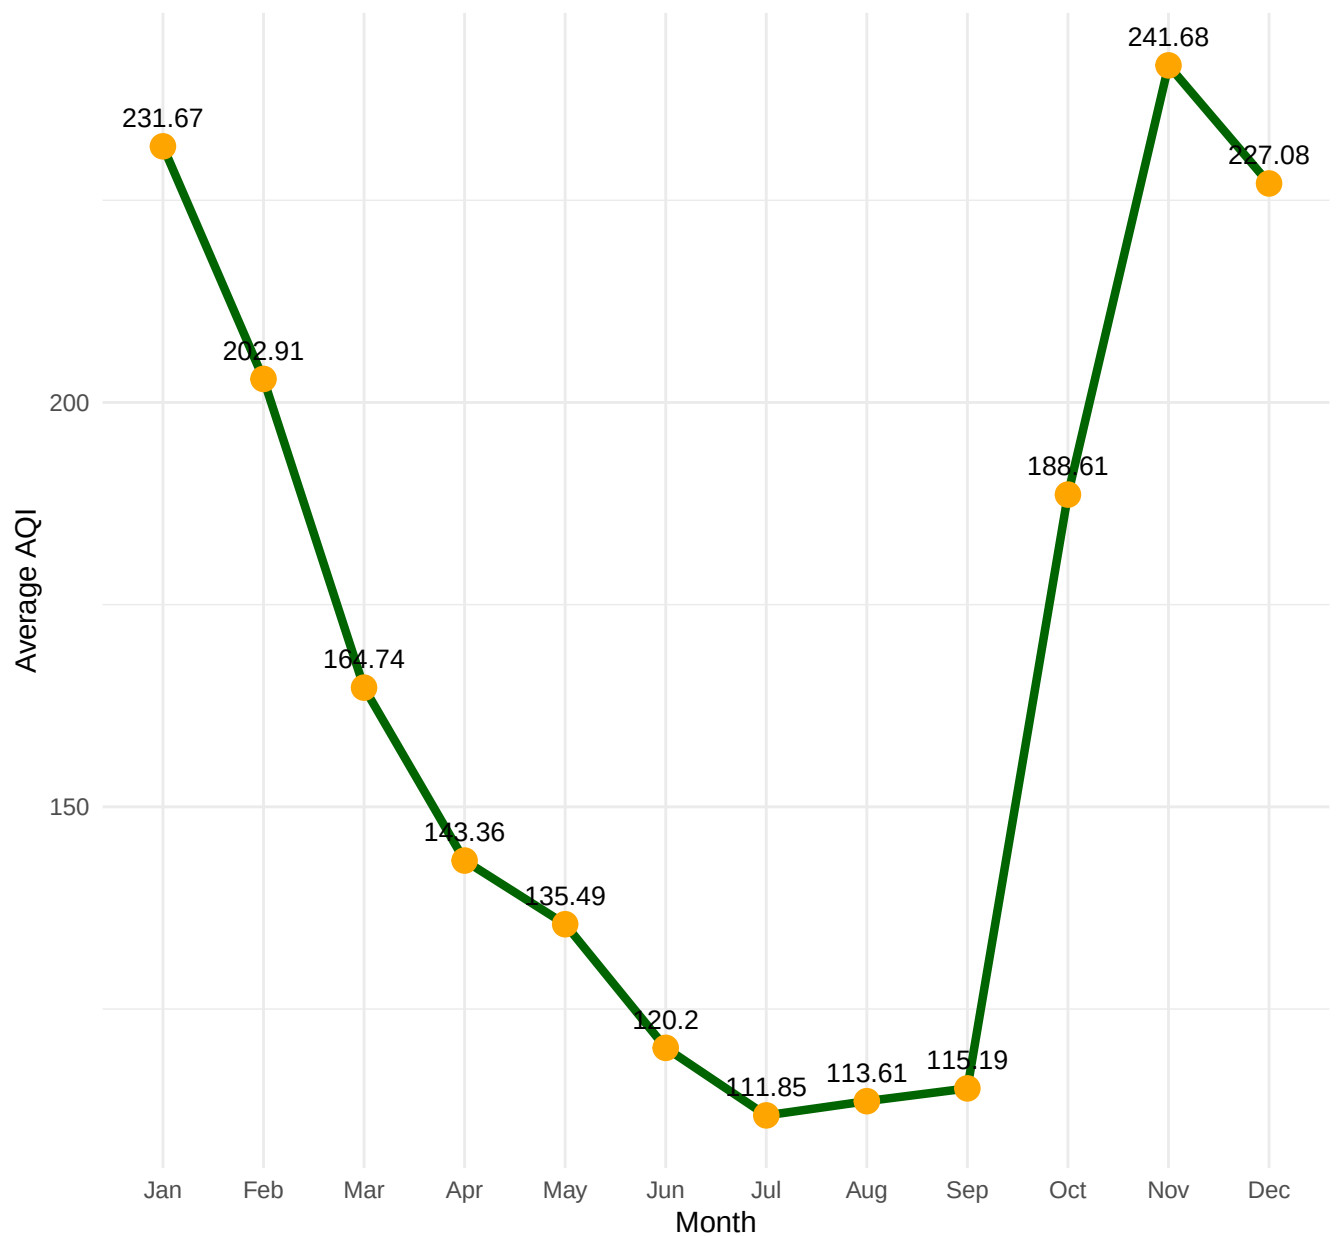

Year-wise AQI Trend (2015–2020)

AQI decreasing over years – COVID lockdown visible in 2020

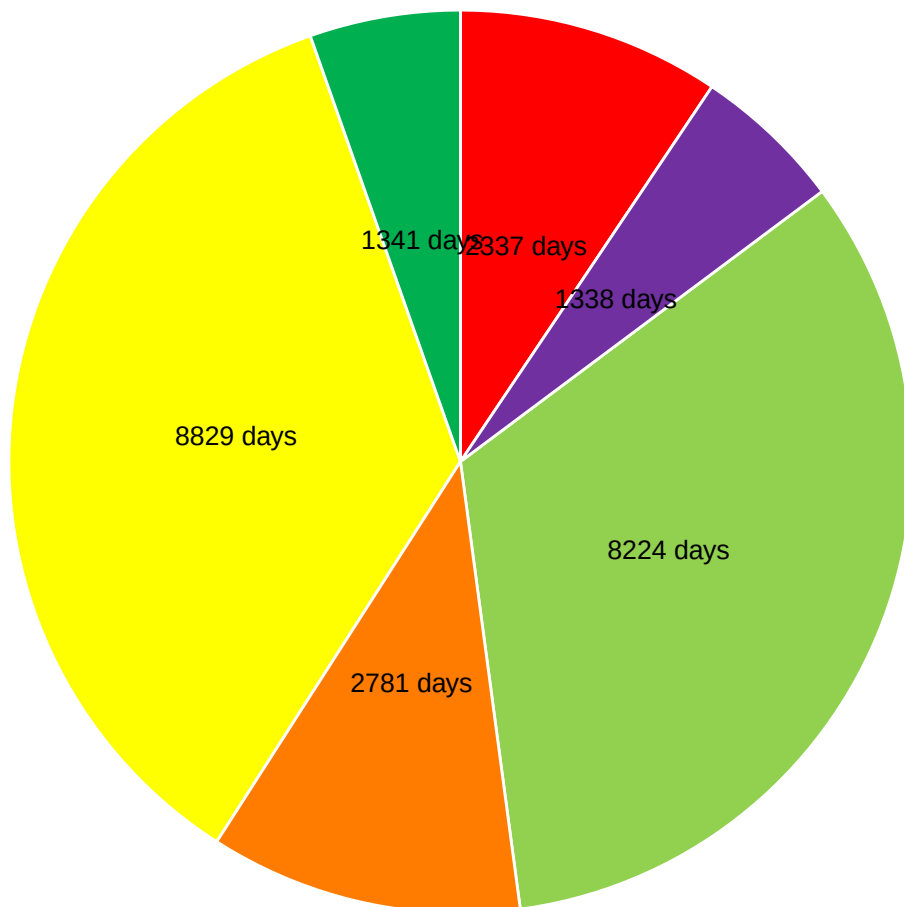

Monthly AQI Trend (Seasonal Patterns)

Monsoon season (Jun–Sep) shows lowest pollution

AQI Category Distribution

Based on Indian AQI Scale

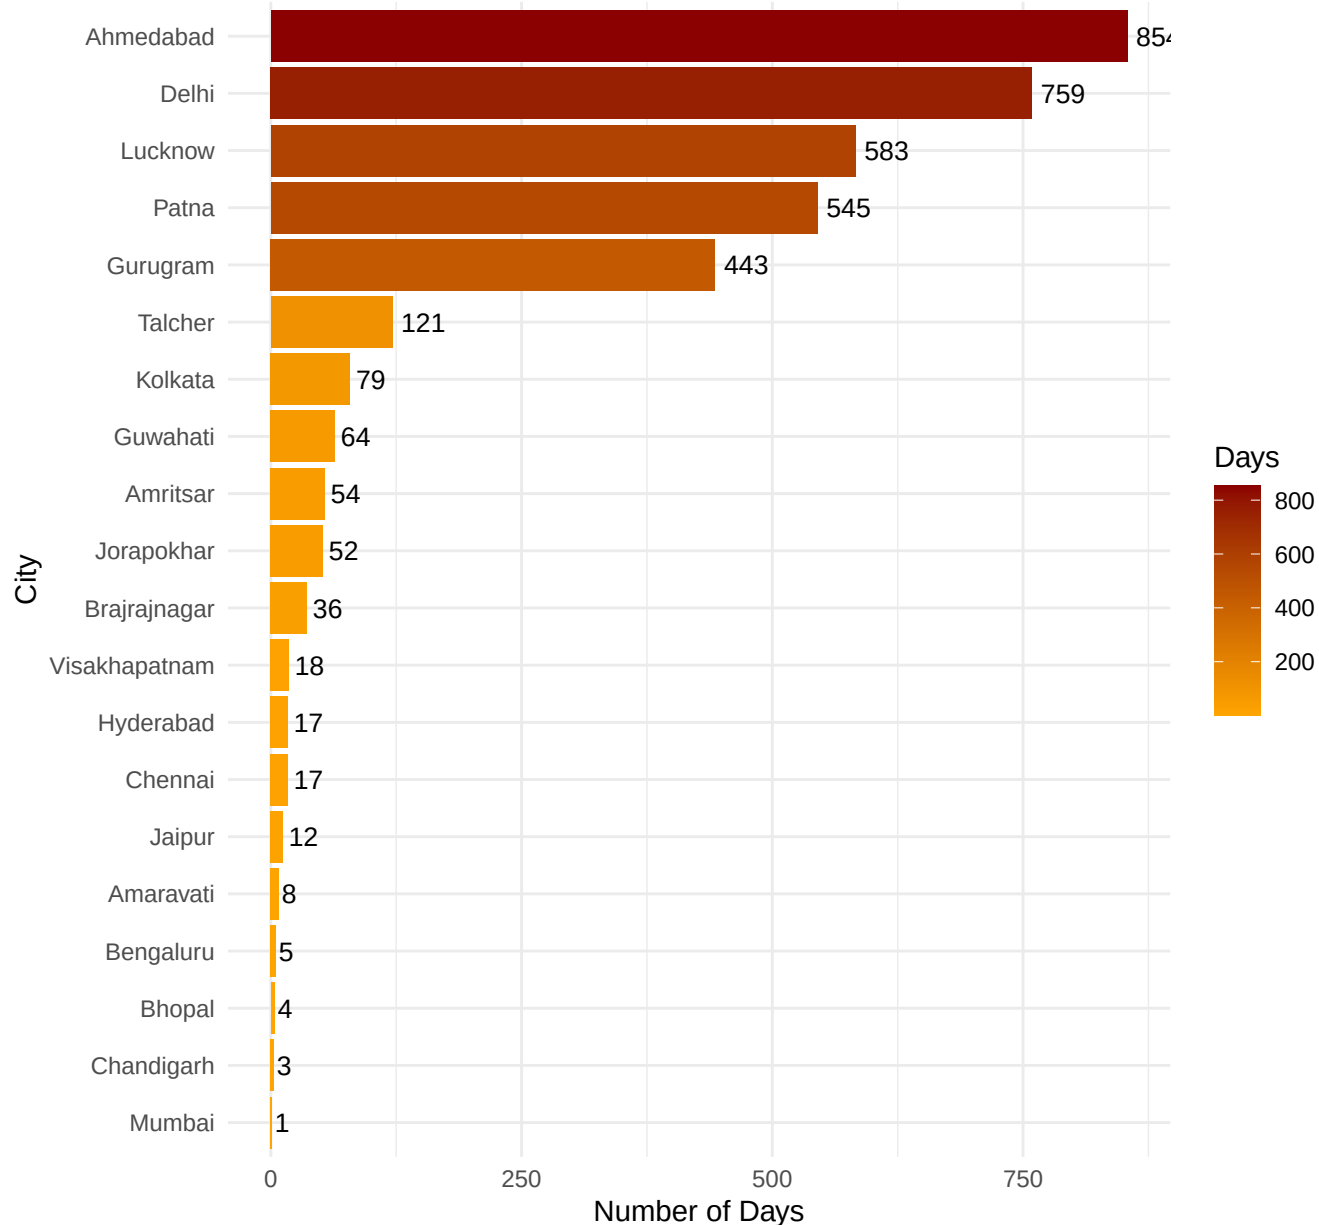

AQI Category

- Good (0-50)
- Moderate (101-200)
- Poor (201-300)
- Satisfactory (51-100)
- Severe (401-500)
- Very Poor (301-400)

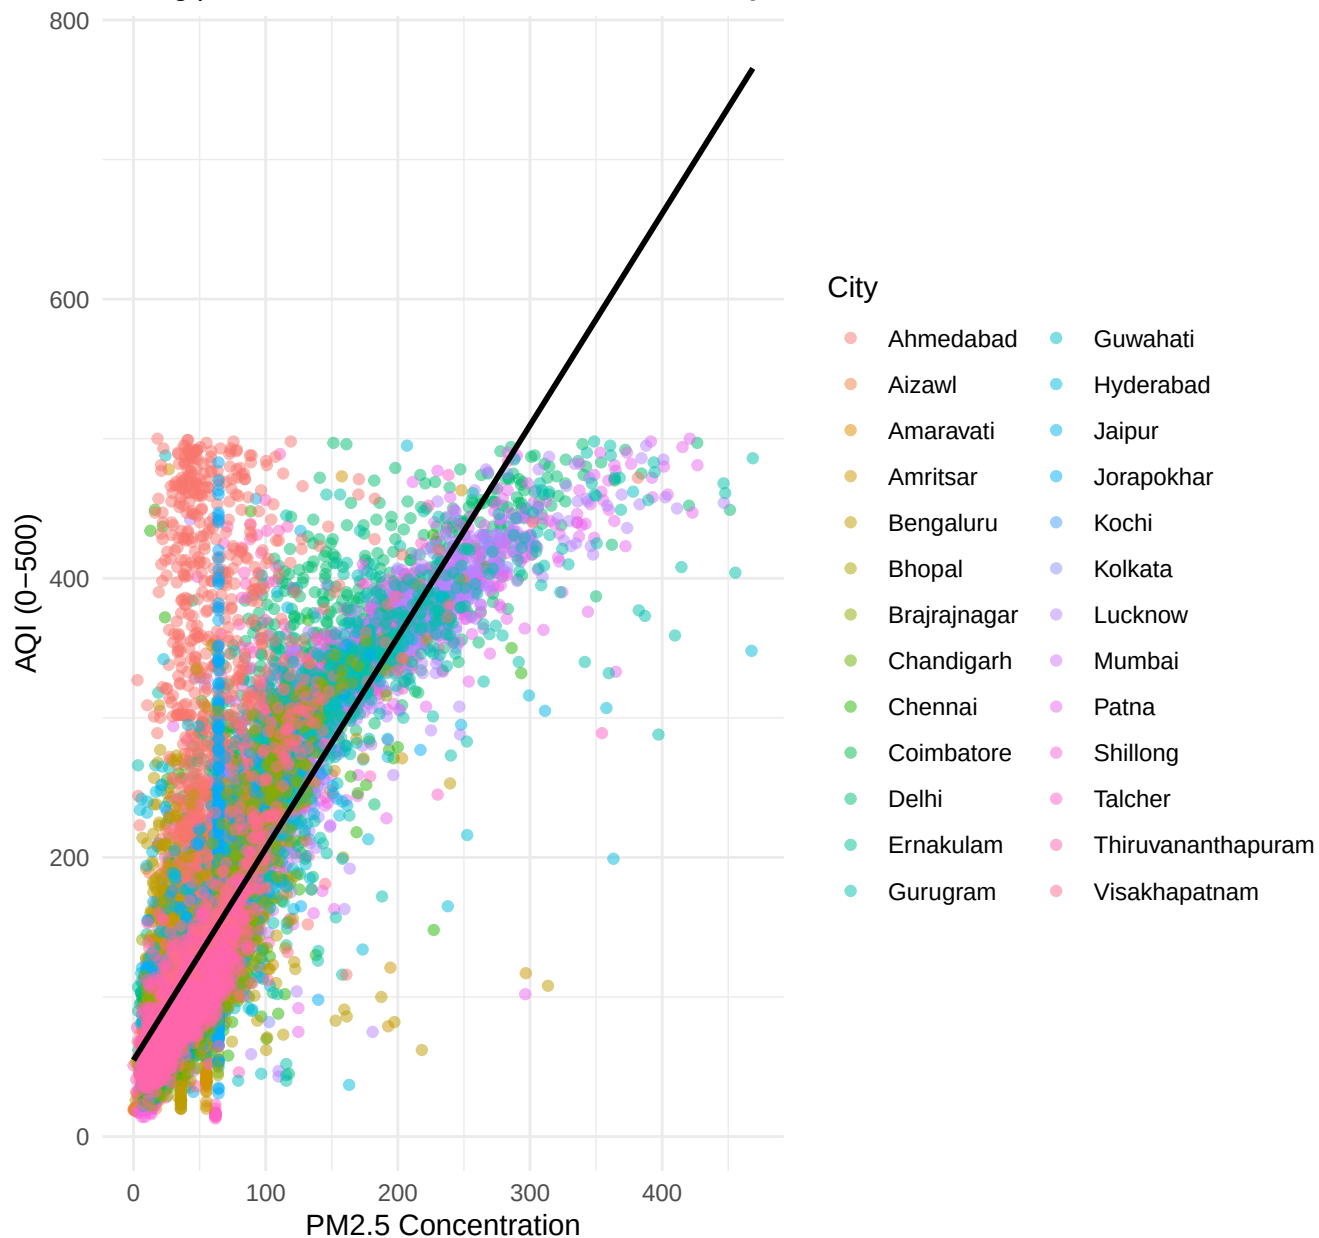

Severe + Very Poor Pollution Days by City

Number of days with AQI > 300

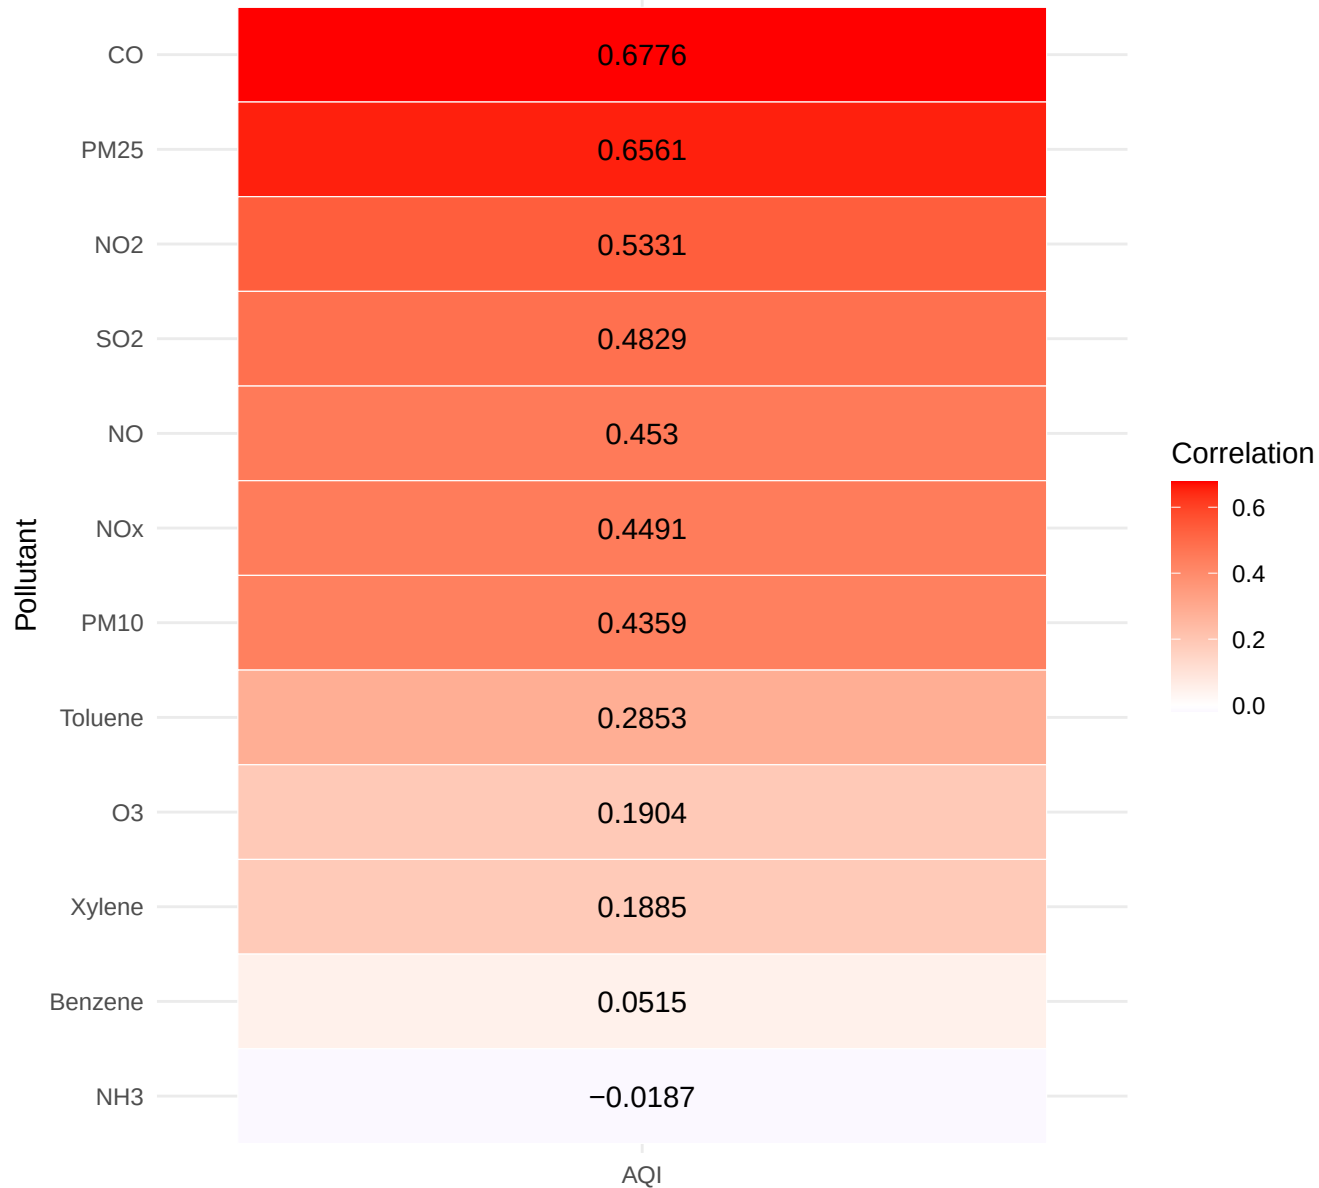

PM2.5 vs AQI Scatter Plot

Strong positive correlation between PM2.5 and AQI

Pollutant Correlation with AQI

Red = strong correlation, Blue = negative correlation

City vs Month AQI Heatmap

Grey = data not available for that month

AQI Spread by City (Boxplot)

Shows min, Q1, median, Q3, max AQI per city (capped at 500)
